

INNOV8 EQUIPMENT

The INNOV8 Equipment Portable Barrier Lifting Cage consists of a galvanized steel cage, with an electric actuator that drives the lifting frame out the side of the vehicle and an electric winch rated and tested under ANZS 1418.

Technical data:

- ✓ Electric winch tested and certified in accordance to ANZS 1418.
- ✓ Electric Actuator that drives the lifting frame out and clear of the vehicle.
- ✓ Galvanized Steel Construction fully seamed welded.
- ✓ Operated by control box from inside the host vehicle.
- ✓ Anderson plugs x 2 fitted to charge the barrier whilst in transport.
- ✓ Limit Switch fitted to frame so slide mechanism cant go past drivers side.
- ✓ Hand brake alarm fitted to warn operator, if not correctly packed up in transport position.

Some advantages of the INNOV8 Portable Barrier Lifting Cage

- ✓ No moisture/corrosion problems due to galvanized steel construction.
- ✓ Slide out safety ladder with platform to reach winch and ratchet strap.
- ✓ One person operation to remove and pack up portable barrier.
- ✓ Removable 4 x push button pendant for slide and winch operation.
- ✓ Low voltage operation no need to test and tag.
- ✓ Modular design can be fitted to other vehicles or trailers(power supply required)
