

INNOV8 EQUIPMENT

Cone Truck

Fitted with a Light Truck Mounted Attenuator (LTMA)

The benefits of custom built traffic Utes and cone trucks are many. Not only does it make the process for setting up/packing away a job on a constant basis more efficient, it also provides vital safety features for workers.

Visual signals such as Arrow and Variable Message Sign (VMS) Boards indicate changes while the LTMA 70KM crash cushion attached to the back of the vehicle will absorb the impact of any errant vehicles if drivers fail to observe changes. Drop wells and sign cages built into the truck mean workers can drop cones from within the relative safety of the cone truck.

- ✓ **Build new or upgrade existing vehicle**
- ✓ **Improve safety**
- ✓ **Improve efficiency**

Capable of carrying

- 2x drop wells
- 1x full colour VMS Board
- 1x Arrow Board
